## Find The Area Of A Square:

Say It! Write It! Repeat It!

E) What is the area of a **right** square whose side is 7 in.?

Since this is a square each side will be 7 in.

$$7 \times 7 = 7^2$$

$$7 \times \underline{\quad} = \underline{\quad} \text{ in.}$$

F) What is the area of a **right** square whose side is 8 in.?

Since this is a square each side will be 8 in.

$$8 \times 8 = 8^2$$

$$8 \times \underline{\quad} = \underline{\quad} \text{ in.}$$

G) What is the area of a **right** square whose side is 9 in.?

Since this is a square each side will be 9 in.

$$9 \times 9 = 9^2$$

$$9 \times \underline{\quad} = \underline{\quad} \text{ in.}$$

H) What is the area of a **right** square whose side is 10 in.?

Since this is a square each side will be 10 in.

$$10 \times 10 = 10^2$$

$$10 \times \underline{\quad} = \underline{\quad} \text{ in.}$$

I) What is the area of a **right** square whose side is 11 in.?

Since this is a square each side will be 11 in.

$$11 \times 11 = 11^2$$

$$11 \times \underline{\quad} = \underline{\quad} \text{ in.}$$
